

# **Galilee 2021 Summer Camp Program**

## **Check-in and Pick-up Procedures**

### **What will arrival look like?**

When you arrive at camp, all family members including your camper must wear masks during the check-in process. (When check-in is over and your camper is with their cohort, they will be allowed to remove their masks.) Please maintain social distance between your household and others, even if you know that household well.

There will be signs directing you to Hunting Lodge. You will look for parking at the church and walk to Hunting Lodge or near Hunting Lodge itself.

There will be a registration table set up near Hunting Lodge. You will check in there. You will then be shown to our health care provider(s) who will review your Medical Forms, your signed Symptom Check form and take any medications. You will then be screened for Covid symptoms.

Please allow yourself enough time to complete this process, which may take up to an hour. There will be staff present to answer any questions you have.

After the registration and health screening you will be taken by a staff member to your camper's lodgings to put their belongings away, but we ask that you do not enter their lodging.

After that your child will join their cohort and you are welcome to depart.

### **What will pick-up look like?**

When you arrive for pick-up, all family members must wear masks during the pick-up process. Please maintain social distance between your household and others, even if you know that household well.

Pick-up will be at Hunting Lodge in the same location as your arrival. Your child will be nearby with their bags packed. You will go to the Checkout table so that a staff person can be sure that the child is departing with the proper person and to return any medications your child may have. After checking out you are welcome to depart.
